

Antoine Gagnepain.

I build products that last and grow the teams behind them, with a hands-on mastery of AI that multiplies what we ship.

Experience

Lead Full-Stack Developer ▾

Jul. 2023 - Present

Little Worker · Bordeaux

Guarantee of synergy between Product, Design and Tech. I orchestrate the technical vision from architectural design to sprint delivery, while mentoring the team daily and overseeing operations.

- **Design & Architecture** – Analysis of product needs and mockups to define optimal architectures for new projects.
- **Delivery & Strategy** – Translation of technical decisions into detailed tickets, effort estimation, strategic prioritization, and smart allocation of tasks to team members based on their strengths and business priorities.
- **Quality & Mentoring** – Owner of software quality and compliance. PR validation through a process combining AI automation and manual review. Ongoing technical mentoring.
- **Product Development** – End-to-end ownership and hands-on contribution on key products:
 - **Business ecosystem** – Platforms for generating complex renovation quotes, digitizing contracts, and tracking job sites.
 - **Design System** – Creation of a cross-product design system to align the ecosystem and accelerate the delivery of new features.
 - **Energy renovation** – Design of an algorithmic engine based on the DPE number to provide energy renovation scenarios.
 - **Matching** – Platforms for automated real-estate matching and intermediary services between individuals and tradespeople.

Next.js · NestJS · React · PostgreSQL · Tanstack · Storybook · Playwright · Jest · Docker · GCP

Full-Stack Web Developer ▾

Sep. 2021 - Jul. 2023

Consoneo · Lormont

Product and infrastructure development across several B2B applications and internal tools, both web and mobile.

- **Products** – Contributions to several key products in the ecosystem.
 - **consoneo.com** – Led the complete redesign of the showcase website.
 - **form-builder** – Internal app for generating dynamic forms for business teams.
- **API** – Design and implementation of APIs (Symfony / ApiPlatform) consumed by web and mobile front-ends.

Symfony · ApiPlatform · Next.js · Nuxt · MySQL · PHPUnit · Docker · AWS

▾ Bordeaux Métropole Energies · Bordeaux

2019 - Sep. 2021

Migration and modernization of business applications for a public energy operator.

Symfony · Zend Framework · Vue.js · Oracle · PHPUnit
