

Antoine Gagnepain.

I build products that last and grow the teams behind them, with a hands-on mastery of AI that multiplies what we ship.

Experience

Lead Full-Stack Developer ▾

Little Worker · Bordeaux

Jul. 2023 – Present

Tech lead on the rebuild of the product ecosystem and internal tools for real-estate professionals.

- **Products** – end-to-end ownership of the ecosystem's key products.
 - **Little Worker Pro** – app ecosystem for real-estate professionals.
 - **Little Worker Studio** – quote builder, client & worker contracting, on-site materials management.
 - **DPE Projection** – built an algorithm using the 3CL method to project energy-renovation gains from a DPE reference.
 - **Acquisition funnel** – full rebuild of the acquisition funnel.
- **Architecture** – Full stack rebuild: tech choices, zero-downtime migration milestones, cross-cutting design system to align the ecosystem.
- **DDD** – Domain-Driven Design + Event Pattern: decoupled domains, fault resilience, module-independent deployments.
- **Monitoring** – Continuous production log monitoring; proactive detection of regressions and incidents before user impact.
- **Standards** – Defined the team's dev standards and built an automated pre-review agent to enforce them, significant cut in code-review time.
- **Quality** – Steward of software quality: code reviews, technical mentorship, ownership of cross-cutting best practices.

Full-Stack Web Developer ▾

Consoneo · Lormont

Sep. 2021 – Jul. 2023

Product and infrastructure work across multiple B2B apps and internal tools, full-stack and mobile.

- **Products** – contributions to several key products in the ecosystem.
 - **bluspark.io** – concierge app for city halls.
 - **consoneo.com** – led the full rebuild of the marketing site.
 - **form-builder** – internal app for generating dynamic forms for business teams.
- **API** – API design and implementation (Symfony / ApiPlatform) consumed by web and mobile front-ends.

Web Developer ▾

Bordeaux Métropole Energies · Bordeaux

2019 – Sep. 2021

Migration and modernization of business apps for a public-sector energy operator.
